Shining a New Light on Tradition.

The chandelier "Ray Dance" fills the space with a radiant dance, reminiscent of sunlight playing on water. Positioned around a substantial steel ring, either three or five nodes cradle six large glass forms each, resulting in a dynamic arrangement. The glass pieces, including olives, spheres, and lanterns, exude an impressive opulence, providing captivating glimpses and reflections.

Precise craftsmanship
demands time

The "Ray Dance" glass forms are meticulously crafted by skilled glassmakers using traditional techniques, fashioned from precious crystal glass. The effort and challenges are equally impressive: A glassmaker balances up to twelve kilograms of glowing glass on their pipe, while three additional people assist in shaping the glass object into the desired form. The substantial wooden molds into which the lantern is blown are crafted from the trunks of beech trees that are over 150 years old.

Ray Dance 5

SPECIFICATIONS

<u>Series</u>	Ray Dance	<u>Material</u>	Hand blown glass in clear flow, smoked flow or citrin flow, Metal frame in black-matte structure or any other RAL colour
<u>Year</u>	2012	<u>Electrics</u>	1.868 Lm, 19W, 230Vac, Warm White (2700/ 3000K), CRI 90+, Leading trailing edge, Dali, 1-10V, Casambi, IP20, Aluminium, A++
<u>Size</u>	H780 W1400 D1400		
<u>Weight</u>	75kg

New technology, same brilliance

Conceived by Stefanie Hering in 2012, the "Ray Dance" chandelier has been outfitted with new, energy-efficient LED lighting technology since 2023. Through a specially developed crystal fixture, it emanates the same brilliance as its previous halogen counterpart, casting forth the eponymous dance of light rays within a space. The chandelier harmoniously blends durable materials with future-proof technology, simultaneously placing energy efficiency and maximum longevity at the heart of our vision for lighting.
